

# US2 S E R I E S

# US2 SERIES

Speed Control Motor and Controller Package

## **US2 Series**

Output Power: 6 W ~ 90 W

# Advanced speed control motor. Sophistication and high performance with greater usability.

One-class higher performance and reliability by advanced D-loop.

Easy-to-use functions and stylish look.

**US2** Series, fully-redesigned from the **US** Series, has been greatly advanced in all aspects.

We strongly recommend this product to all the customers who uses speed control motors.

D-loop uses the AC motor for speed control and the speed controller implementing unique technology only from ORIENTAL MOTOR.

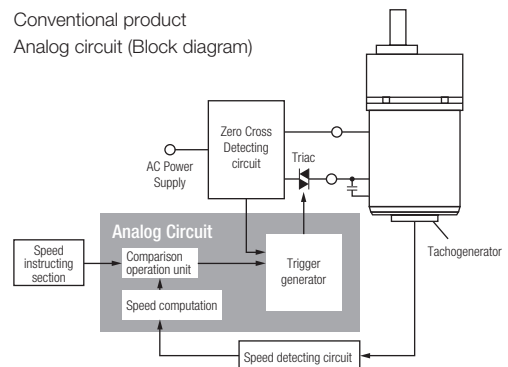

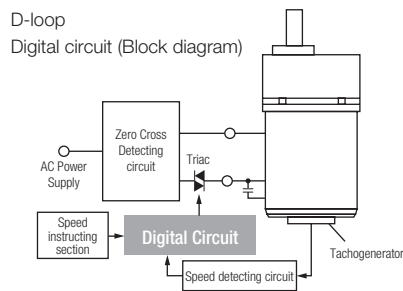

D-loop provides high reliability using closed loop control and compactness of the speed controller from the digitized phase control circuit.

## Digitization of control circuit

Digitization applied to most of the conventional analog circuit, which was then incorporated into the CPU, resulting in significant reduction of the circuit volume. This enables us to achieve compactness and competitive prices.

In addition, using the digitization, the deviation between the speed command value and the speed detection value can become closer to zero, improving the speed variation from  $-5\%$  to  $\pm 1\%$  (reference)\*.

\* Between 0 and the permissible torque 1000 r/min

## Easy operation

With the digital display panel and setting dial installed, you can intuitively operate the motor, like "turn as needed and push".

The operation setting is simple to use without using manual.

Turn the dial to set desired value and the speed.

Variable Speed Range  
 50 Hz: 90~1400 r/min  
 60 Hz: 90~1600 r/min

[Start/Stop]

You can switch start/stop or rotation direction by just one switch operation.

No external switch is required.

[Switching the Rotation Direction]

# Simple wiring

Simply connect the motor with the speed controller and the power supply, the controller will start right away.  
The connectors and built-in capacitor of the speed controller save you from wiring problem.

Simple connection using the connector between the motor and the speed controller.  
The distance between the motor and the speed controller can be extended up to 10.5 m.

The built-in capacitor do not require wire connection, hence saving space.

# Advanced performance

Varies of improvements have been implemented including portions not clearly distinguished from the appearance.

This series adopts the motor gearhead with high permissible torque and high strength.

D-loop achieves stable operation with small speed fluctuation.

Less noise makes the system configuration simple.

You will realize certain advancement once using the product.

## Motor gearhead with high permissible torque and high strength

This series uses the motor and gearhead of the **KII** Series.

The gearhead has been strengthened by using a case with its rigidity enhanced with our unique side plate and heat-treated gear.

### Parallel Shaft Combination Type “For Gearhead with holding angle of 80 mm”

- ① Permissible Radial Load 450 N  
(10 mm from the tip of the output shaft)
- ② Permissible Axial Load 100 N

Rated Life of Gearheads

**10000 hours (Twice the hours of the conventional product)**

## Stable operation even with fluctuated load

The rate generator installed in the AC motor always check the speed, thus maintaining the set speed even when the load fluctuates. In addition, digitization of the control circuit has improved the speed regulation from  $-5\%$  to  $\pm 1\%$  (reference value).

Speed Regulation (For load)  $\pm 1\%$ ※ (Reference value)

※Between 0 and the permissible torque 1000 r/min

## Simple system configuration with low noises

The motor and speed controller used for the **US2** Series can emit little inherent noises. No peripherals require to reduce noise, hence able to achieve space saving and reduce installation work and cost.

**Inverter + Three-Phase motor [PWM control]**

Controlled voltage and frequency 300 times of switching per cycle

[Condition] ● Carrier frequency: 15 kHz

● Set frequency: 50 Hz

**US2 Series [Phase control]**

Controlled voltage 2 times of switching per cycle

[Condition] ● Power supply frequency: 50 Hz

Actual size

## Useful functions

Open the front panel, you can set variety of functions.

For example, you can easily start or stop the motor,  
or lock data setting to prevent the set speed from changing.

Useful functions will support customers from every perspective.

### 1 Main Functions

The functions can be set with the FUNCTION key.

#### 🔍 Indication

You can set the display settings of the gear output shaft speed and conveyor transportation speed.

#### ↔ Selection of moving direction

You can select which one to use for operation: the switch on the front panel or external instructions.

#### 🔒 Data protection (Lock)

The data setting can be locked to prevent the set speed from changing.

### 2 Smooth operation when starting/stopping

Acceleration/deceleration time can be set with the use of acceleration/deceleration time potentiometer.

**Setting time: 0.1 ~ 15.0 seconds (By factory default, fixed to 1 second)**

※ The acceleration/deceleration time potentiometer must be enabled in advance by the FUNCTION key.

● The instantaneous stop function is not available.

### 3 Protection of Speed Controller

When overheating, connection failure, or locking occurs in the motor, an alarm is displayed to protect the motor speed controller.

# Lineup

Parallel Shaft Combination Type  
Maximum Permissible Torque 40 N·m

---

Output Power 6 W/15 W/25 W/40 W/60 W/90 W

---

Power Supply Single-Phase 110 VAC/115 VAC  
Voltage Single-Phase 220 VAC/230 VAC

---

Round Shaft Type  
Maximum Permissible Torque 0.73 N·m

---

Output Power 6 W/15 W/25 W/40 W/60 W/90 W

---

Power Supply Single-Phase 110 VAC/115 VAC  
Voltage Single-Phase 220 VAC/230 VAC

---

● For price and leadtime, please contact the nearest Oriental Motor sales office.

## A motor and a gearhead pre-assembled

The combination type comes with a motor and a gearhead pre-assembled, providing the following advantages.

### MERIT

---

#### 01. Easy installation of Motor/Gearhead to Equipment

Do not require hands-on support when installing both motor and gearhead.

#### 02. Do not worry about motor pinion shaft been damaged

The motor pinion shaft will not be damage accidentally at the time of installation, thus no noise emitted from the gear teeth.

#### 03. The gearhead can be replaced. (For Parallel Shaft Combination Type)

For the parallel shaft combination type, the gearhead can be easily replaced when changing the gear ratio.

# System Configuration

## Parallel Shaft Combination Type

### Connection Cable (Sold separately)

Connection cables are sold separately. When extending the distance between the motor and the speed controller by 4 m or more and when repeatedly bending the cables, use connection cables sold separately or a flexible extension cables.

Connection Cable

## Types

### Combination Type

The combination type comes with a motor and a gearhead pre-assembled.  
The combination of the motor and the gearhead can be changed.  
They are also available separately. You can remove the gearhead to change the installation position by 90°.

- Connection cable included: The price includes the prices of the motor, geared, speed controller, connection cable (1 m, 2 m and 3 m).
- Connection cable sold separately: The price includes the prices of the motor, gearhead, and speed controller. Connection cables are sold separately, and available with the combination type or the round shaft type.

## Common Specifications

Item	Specifications
Speed Setting Methods	Digital setting by the dial (Speed can be set in 1 r/min increments)
Variable Speed Range	50 Hz: 90~1400 r/min 60 Hz: 90~1600 r/min Default: 90 r/min
Acceleration/Deceleration Time	0.1~15.0 seconds (Default: Fixed to 1.0 second) Acceleration time/deceleration time varies with the load condition of the motor.
Function	Parameters
	Monitoring
	Others
Input Signals	Photocoupler Input Input Resistance 2 kΩ Two input points: FWD input and REV input
Protective Functions	When the following protective functions are activated, the motor will coast to a stop, and the alarm code will appear on the control panel. Alarm types: Motor overheat, Motor lock, Improper motor connection, EEPROM error, Prohibition of operation at the initial setting
Maximum Extension Length	Motor and Speed Controller Distance 10.5 m (including 0.5 m of the motor cable)

## General Specifications

Item	Motor	Speed Controller
Insulation Resistance	100 MΩ or more when 500 VDC megger is applied between the windings and the case after continuous operation under normal ambient temperature and humidity.	The value is 100 MΩ or more when measured by a 500 VDC megger between the main circuit terminal and the input signal terminal, between the main circuit terminal and the case, and between the main circuit and FG after continuous operation under normal ambient temperature and humidity.
Dielectric Strength	No abnormality is judged even with application of 1.5 kVAC at 50 Hz or 60 Hz between the windings and the case for 1 minute after continuous operation under normal ambient temperature and humidity.	No abnormality is judged even with application of 1.9 kVAC at 50 Hz or 60 Hz between the main circuit terminal and the input signal terminal and between the main circuit terminal and the case, and 1.5 kVAC at 50 Hz or 60 Hz between the main circuit terminal and FG for 1 minute after continuous operation under normal ambient temperature and humidity.
Temperature Rise	A gearhead or equivalent heat sink*1 is connected to the motor and the winding temperature rise is measured at 80°C or less using the resistance change method after continuous operation with no load under normal ambient temperature and humidity.	—
Overheat Protection Device	The 6 W type is impedance protected. All other motors have a built-in thermal protector (automatic return type).	—
Operating Environment	Ambient Temperature	0~+50 °C (Non-freezing)
	Ambient Humidity	85% or less (Non-condensing)
	Altitude	Up to 1000 m above sea level
	Atmosphere	No corrosive gases or dust. Not exposed to water or oil Cannot be used in a radioactive area, magnetic field, vacuum, or other special environments.
Storage Conditions*2	Ambient Temperature	-25~+70 °C (Non-freezing)
	Ambient Humidity	85% or less (Non-condensing)
	Altitude	Up to 3000 m above sea level
	Atmosphere	No corrosive gases or dust. Not exposed to water or oil Cannot be used in a radioactive area, magnetic field, vacuum, or other special environments.
Heat-resistant Class	130 (B)	—
Degree of Protection	IP20	IP20

\*1 Heat sink size (Material: Aluminum)

Motor Output Power	Size (mm)	Thickness (mm)
6 W	115×115	5
15 W	125×125	
25 W	135×135	
40 W	165×165	
60 W	200×200	
90 W	200×200	

\*2 The storage condition applies to a short period such as a period during transportation.

### Note

- Do not measure insulation resistance or perform the dielectric strength test while the motor and speed controller are connected.

## Output Shaft Speed of the Combination Type

## Permissible Radial Load/Permissible Axial Load

### Combination Type

Product Name	Gear Ratio	Permissible Radial Load N		Permissible Axial Load N
		Distance from the tip of the gearhead output shaft 10 mm	20 mm	
<b>US2-26</b>	<b>5~25</b>	150	200	40
	<b>30~360</b>	200	300	
<b>US2-315</b>	<b>5~25</b>	200	300	80
	<b>30~360</b>	300	400	
<b>US2-425</b>	<b>5~25</b>	300	350	100
	<b>30~360</b>	450	550	
<b>US2-540</b> <b>US2-560</b>	<b>5~9</b>	400	500	150
	<b>12.5~18</b>	450	600	
<b>25~300</b>	500	700		
<b>US2-590</b>	<b>5~9</b>	400	500	150
	<b>12.5~18</b>	450	600	
	<b>25~180</b>	500	700	

### Round Shaft Type

Product Name	Permissible Radial Load N		Permissible Axial Load
	Distance from the tip of the motor output shaft 10 mm	20 mm	
<b>US2-26</b>	50	110	Half of motor mass or less*
<b>US2-315</b>	40	60	
<b>US2-425</b>	90	140	
<b>US2-540</b>	140	200	
<b>US2-560</b> <b>US2-590</b>	240	270	

\*Avoid axial loads as much as possible.

If axial load is unavoidable, keep it at half or less of the motor mass.

## Gearhead Transmission Efficiency

Product Name	Gear Ratio	7.5	9	12.5	15	18	25	30	36	50	60	75	90	100	120	150	180	250	300	360

## How to Read Speed – Torque Characteristics

The characteristics diagram on the right shows the relationship between each setting speed and torque when a speed control motor is operated.

- ① 50 Hz Safe-Operation Line    ② 60 Hz Safe-Operation Line

The safe-operation line is the permissible line of the torque that is limited according to the permissible temperature.

Motors can be operated at a continuous rating within the safe-operation line.

The safe-operation line is determined under the most severe condition where there is no heat conduction. Therefore, the motor can be operated depending on installation conditions of the motor.

### Note

- When operating beyond the safe-operation line, make sure the motor case temperature is kept at 90°C or less.

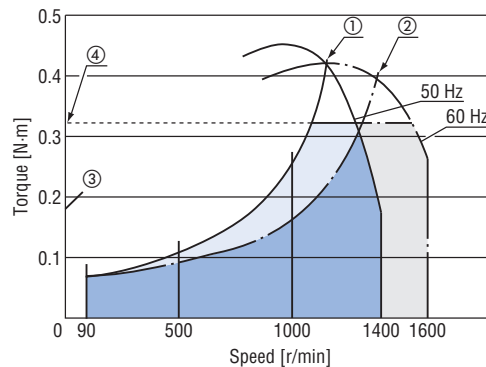

- ③ Starting Torque

This refers to the size of torque with which the motor can start.

- ④ Combination Type Permissible Torque

This refers to the permissible value of the motor torque when operating with the gearhead installed.

The permissible torque of the combination type varies according to the gear ratio. Use the motor without exceeding the value on the list of permissible torques.

## Speed – Torque Characteristics (Reference)

- ① 50 Hz Safe-Operation Line    ② 60 Hz Safe-Operation Line    ③ Starting Torque    ④ Combination Type Permissible Torque

- The characteristics of each output are their representatives. (For motor only)

The permissible torque and starting torque of the motor vary according to the voltage. Check the specifications and the permissible torque of the combination type when using the motor.

## Dimensions (Unit: mm)

● "Installation screws" are included with the combination type. Dimensions of installation screws → Page 22

● A number in the box □ in the product name indicates the gear ratio.

When the accessory connection cable is supplied, a number indicating the length of the cable, **-1** (1 m), **-2** (2 m), or **-3** (3 m), is specified in the box ■ in the product name.

● A number in the box □ in the product name indicates the gear ratio.

When the accessory connection cable is supplied, a number indicating the length of the cable, **-1** (1 m), **-2** (2 m), or **-3** (3 m), is specified in the box ■ in the product name.

# Connection and Operation

## Names and Functions of Speed Controller Parts

### Indication

Displays speed, alarm, etc.

### Operating Switch

Placing the switch to "RUN" rotates the motor. Setting it to the "STAND-BY" position stops the motor.

### Dial

Changes the speed and parameters. The value is set when the dial is pressed after changes are made.

### Rotation Direction Switch

Changes the rotation direction of the motor.

### Front Panel

[Front]

### Input Signal Terminals

Connect to it only when operating by external signals.

### Motor Connector

Connect the connector of the motor.

### Power Connector

Connect the AC power supply.

[Back]

### Cable Holding Hook

The motor cables can be bundled with the included belt.

### When Front Panel is Removed

#### ESC Key

Go back to the previous function.

#### FUNCTION Key

Switch the function.

#### Acceleration/Deceleration Time Potentiometer

Set the acceleration/deceleration time. Setting range: 0.1 s ~ 15.0 s

#### Installation Holes (2 places)

## Extended Functions

Remove the front panel to be able to perform various settings by operating the keys.

Operating Mode	Details
Monitoring	Rotation speed, Input signals
Parameters	Gear ratio, Speed up ratio, Fixed display of the lower first digit, Prohibition alarm of operation at the initial setting, Upper and lower limits of speed, Acceleration and deceleration time, External operating signals, Data initialization
Others	Locking of data editing

### Main Power Connector (CN1)

Connect the AC power supply to CN1. Use the FG terminal to connect to a ground. (The colors in the following figures apply when using the power supply cable.)

- Single-Phase 110/115 VAC,
- Single-Phase 220/230 VAC

- Applicable Lead Wire Size  
AWG18~14 (0.75~2.0 mm<sup>2</sup>)

## Operation with the Driver only

### Run/Stop

When the operating switch is set to the "RUN" position, the motor will start. When it is returned to the "STAND-BY" position, the motor decelerates to a stop.

### Speed Setting Method

Set the motor speed by using the dial.  
Setting range: 90~1400 r/min (50 Hz)  
90~1600 r/min (60 Hz)

Turning the dial slowly to the right increases the speed by 1 r/min increments, while turning it to the left reduces the speed by 1 r/min increments. Turning the dial fast produces a great variation in speed. Pressing the dial sets the speed.

Operation with the operating switch

Setting the speed with the dial

### Operating Switch

● Operation by External Signals

◇ Operating Method

- To perform run/stop by external signals, connect input signals to TB1.

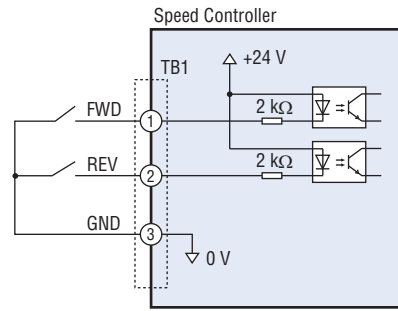

● Input Signal Terminal (TB1)

Indication	Signal Name	Description
1	FWD	Forward input
2	REV	Reverse input
3	GND	Input signal common

◇ Example for connection using switches, relays, etc.

The figure shows a connection example for the operation of the motor using relays or switches.

● Applicable Lead Wire

AWG24~16 (0.2~1.25 mm<sup>2</sup>)

# Connection Cables/ Flexible Connection Cables (Sold separately)

This is a connection cable for connecting the motor and the speed controller. Use the flexible connection cable in applications where the cable is bent and flexed.

● Cable System Configuration

**Note**

- You can connect connection cables or flexible connection cables sold separately to a product with connection cables. In this case, the total length of these cables must be within 10.5 m (including 0.5 m of the motor cable) and up to 3 cables connected.

● Types

◇ Connection Cables

Product Name	Length L (m)
<b>CC01SC</b>	1
<b>CC02SC</b>	2
<b>CC03SC</b>	3
<b>CC05SC</b>	5
<b>CC10SC</b>	10

◇ Flexible Connection Cables

Product Name	Length L (m)
<b>CC01SCR</b>	1
<b>CC02SCR</b>	2
<b>CC03SCR</b>	3
<b>CC05SCR</b>	5
<b>CC10SCR</b>	10

● Dimensions (Unit: mm)

# Accessories (Sold separately)

## Circuit Products Mounting Brackets

Mounting brackets for installing the driver are available.

Mounting brackets have product lines for different applications such as for DIN rail installation, installation on the wall surface, and for conveyor guide installation.

### Types

Material: SPCC Surface treatment: Trivalent chromate

Product Name	Application
<b>MADP05-15</b>	For DIN Rail Installation
<b>MAFP04-15</b>	For Wall Surface Installation
<b>MAFP05V</b>	For Conveyor Guide Installation
<b>MAFP05H</b>	

### Note

Circuit products mounting brackets cannot be used together with the watertight and dust-resistant type front cover.

**MADP05-15** <Application example>

**MAFP04-15** <Application example>

**MAFP05V** <Application example>

**MAFP05H** <Application example>

## Flexible Couplings

These are clamp type couplings for connecting the motor and gearhead shaft with the driven shaft.

Once the gearhead is determined, the coupling can be selected.

● Couplings can also be used with round shaft types. Select a coupling with the same inner diameter size as the motor shaft diameter.

### Parallel Shaft Combination Type

Applicable Product	Load Type	Coupling Type
<b>US2-26</b>	Uniform load	<b>MCL30</b>
	Shock load	
<b>US2-315</b>	Uniform load	<b>MCL30</b>
	Shock load	<b>MCL40</b>
<b>US2-425</b>	Uniform load	<b>MCL40</b>
	Shock load	<b>MCL55</b>
<b>US2-540</b> <b>US2-560</b> <b>US2-590</b>	Uniform load	<b>MCL55</b>
	Shock load	

## Motor and Gearhead Mounting Brackets

These dedicated mounting brackets are for mounting motors and gearheads.

Product Name	Applicable Product
<b>SOL2M4F</b>	<b>US2-26</b> Round Shaft Type
	<b>US2-26</b> Parallel Shaft Combination Type
<b>SOL3M5F</b>	<b>US2-315</b> Round Shaft Type

<b>SOL5M8F</b>	<b>US2-540, US2-560, US2-590</b>
	Parallel Shaft Combination Type

For details, check the Oriental Motor website or contact the Oriental Motor sales office.

## Watertight and Dust-Resistant Type Front Cover

This cover protects the front panel of the speed controller. The degree of protection conforms to the IP64 specification.

The cover can also be used to prevent operation errors on the front panel.

### Types

Product Name	
	<b>PCF12</b>

#### Note

The watertight and dust-resistant type front cover cannot be used together with Circuit products mounting bracket.

### Names of Parts

### Specifications

Degree of Protection	IP64 (Conforms to IEC 60529)	
Material	Cover	Polycarbonate
	Gasket	Polyethylene (foam)
	Frame	Polybutylene terephthalate Acrylonitrile, Butadiene, Styrene
	Lock	Polyacetal

### Installation Condition

Install the front cover to a flat and smooth metal plate.

- Indoors
- Operating Ambient Temperature: 0 ~ +50°C
- Operating Ambient Humidity: 85% or less
- Not exposed to an explosive atmosphere, strong acid/strong alkali, organic solvent (chloroethane, chloromethane, cresol, etc.)
- Not exposed to radioactive materials
- Not exposed to moisture or ozone
- Not exposed to direct sunlight
- Not exposed to continuous vibration or excessive shock

### Speed Control Motor and Controller Package

# DSC Series

These are high-performance D-loop speed control motor units at an affordable prices.

This series will meet your needs, which include functions such as – "multistep speed-change operation", "speed setting from an external device", "vertical operation", and so on.

#### ● Characteristics

- Multistep speed-change operation (4-speed gear) is available.
- Speed can be set from an external device.
- Vertical operation is available (with electromagnetic brake)
- Speed regulation (For load)  $\pm 1\%$ \* (Reference value)
- **KII** Series motor with High-performance gear installed is used.

\*Between 0 and the permissible torque at 1000 r/min

#### Safety Precautions

- To ensure correct operation, carefully read the Operating Manual before using it.
- The products listed in this catalogue are for industrial use and for built-in component. Do not use for any other applications.

- The factories which manufacture the products listed in this catalogue have obtained Quality Management Systems ISO9001 and Environment Management Systems ISO14001.
- The content listed in this catalogue such as performance and specifications of the products are subject to change without notice for improvements.
- The price of all products listed in this catalogue does not include the consumption tax etc.
- For details of the products, please contact the nearest dealer, sales office or the following "Order Support Center" or "Customer Support Center".
- **Orientalmotor** is registered trademark or trademark of Oriental Motor in Japan and other countries.
