### Load Resistant, Dust Cover for Adverse Environments

#### 2 types of finger materials

Standard: Carbon steel

Option: Stainless steel

#### 3 types of dust cover materials

Standard: Chloroprene rubber (CR) ..... Black

Optional: Fluororubber (FKM) ..... Black

Silicone rubber ..... White

# Wedge Cam Operation Provides Dust Cover for Adverse

## Auto switch mountable

Grooves for auto switch are located on one side. Easy handling for adjustment and installation.

Pin hole for positioning on top side

## Built-in adjustment needle for finger speed

Possible to adjust the speed for finger closing direction.

## Wedge cam structure

The wedge structure allows no lateral vibration along stroke direction once work is held.

## High rigidity

Slide type guide bearing enables highly rigid finger motion.

High precision repeatability:  
 $\pm 0.01$  mm

## Improved performance

Incorporation of dust cover prevents dust, water, etc. from entering the body and avoids generating dust and releasing grease from air gripper.

2 types of finger materials are available for different applications.

Standard: Carbon steel  
Option: Stainless steel

3 types of dust covers are available for use in different environments.

Standard: Chloroprene rubber (CR) ..... Black  
Optional: Fluororubber (FKM) ..... Black  
Silicone rubber ..... White

Longer strokes are now standard.

Bore size (mm)	Opening/Closing stroke (mm)	
	Long stroke	Standard stroke
12	11	4
16	14	6
20	18	10
25	22	14

# High Precision and Rigidity. Environmental Conditions.

## MHK2 Series

### Application

Assembling

### Transferring

### Loading/Unloading work into machine tools

### Universal mounting

#### Axial mounting

(Body tapped)

#### Vertical mounting

(Body tapped)

#### Lateral mounting

(Body tapped)

(Body through-hole)

Interchangeable with MHQG2 Series

### Series Variations

## Air Gripper/2-Finger Type

# MHK2 Series

ø12, ø16, ø20, ø25

### How to Order

Standard type

MHK 2 - 20 D 1 F - M9B [ ] - [ ]

Long stroke type

MHKL 2 - 20 D 1 F - M9B [ ] - [ ]

Number of fingers ●  
2 2 fingers

Bore size ●

12	12 mm
16	16 mm
20	20 mm
25	25 mm

Action ●

D	Double acting
S	Single acting (Normally open)
C	Single acting (Normally closed)

Finger material ●

Nil	Carbon steel
1	Stainless steel

Made to Order  
Refer to page 551 for details.

Number of auto switches ●

Nil	2 pcs.
S	1 pc.

Auto switch ●

Nil	Without auto switch (Built-in magnet)
-----	---------------------------------------

Dust cover material ●

Nil	Chloroprene rubber (CR)
F	Fluororubber (FKM)
S	Silicone rubber

### Applicable Auto Switches/Refer to pages 797 to 850 for further information on auto switches.

Type	Special function	Electrical entry	Indicator light	Wiring (Output)	Load voltage		Auto Switch model		Lead wire length (m) <sup>*)</sup>			Pre-wired connector	Applicable load	
					DC	AC	Electrical entry direction		0.5 (Nil)	1 (M)	3 (L)			5 (Z)
							Perpendicular	In-line

### Model Selection Example

#### Procedure

### Gripping Point

#### External grip

#### Internal grip

L: Gripping point distance  
H: Overhang distance

- Proper gripping points should be selected in accordance with the operating pressure. The distance to the gripping point L and the overhang distance H should be within the limited range given in the graphs below.
- When the gripping point distance becomes large, the finger attachment applies an excessively large load to the finger sliding section, causing excessive play of the fingers and possibly leading to premature failure.

### Gripping Point Range Limit

Note) Distance to the gripping point L of single acting type is shortened by spring return.  
Use air gripper within gripping force line shown for each pressure in effective gripping force graph.

## Effective Gripping Force: MHK2 Series Single Acting

### • Indication of effective gripping force

The effective gripping force shown in the graphs to the right is expressed as  $F$ , which is the thrust of one finger, when both fingers and attachments are in full contact with the workpiece as shown in the figure below.

Note) In case of single acting type, the value is for stroke center.

### External grip MHK2 Series

### Internal grip MHK2 Series

### • Precautions when using the single acting type:

If a moment such as that illustrated below is applied to the finger, the finger might not be able to retract by the spring force alone. Therefore, make sure to use the air gripper within the allowable moment that is indicated in the table below.

### Allowable Moment

Model	Allowable moment (N·m)
MHK2-12S/C	0.05
MHK2-16S/C	0.12
MHK2-20S/C	0.25
MHK2-25S/C	0.49

## Auto Switch Installation Examples and Mounting Positions

Various auto switch applications are possible through different combinations of auto switch quantities and detecting positions.

### 1) Detection when Gripping Exterior of Workpiece

Detection example		1. Confirmation of fingers in reset position	2. Confirmation of workpiece held	3. Confirmation of workpiece released
Position to be detected		Position of fingers fully opened 	Position when gripping a workpiece 	Position of fingers fully closed 
Operation of auto switch		Auto switch turned ON when fingers return. (Light ON)	Auto switch turned ON when gripping a workpiece. (Light ON)	When a workpiece is not held (Abnormal operation): Auto switch to turn ON (Light ON)
Detection combinations	One auto switch = One position, any of ①, ② and ③ can be detected.	●	●	●
	Two auto switches = Two positions of ①, ② and ③ can be detected.	Pattern A	●	—
		Pattern B	—	●
Pattern C	●	—	●	
How to determine auto switch installation position		Step 1) Fully open the fingers. 	Step 1) Position fingers for gripping a workpiece. 	Step 1) Fully close the fingers. 
At no pressure or low pressure, connect the auto switch to a power supply, and follow the directions.		Step 2) Insert the auto switch into the auto switch installation groove in the direction shown in the following drawing. 		
		Step 3) Slide the auto switch in the direction of the arrow until the indicator light illuminates. 	Step 3) Slide the auto switch in the direction of the arrow until the light illuminates and fasten it at a position 0.3 to 0.5 mm in the direction of the arrow beyond the position where the indicator light illuminates. 	
		Step 4) Slide the auto switch further in the direction of the arrow until the indicator light goes out. 	Position where light turns ON 	
		Step 5) Move the auto switch in the opposite direction and fasten it at a position 0.3 to 0.5 mm beyond the position where the indicator light illuminates. 	Position to be secured 	
		Position where light turns ON 	Position to be secured 	

Note 1) It is recommended that gripping of a workpiece be performed close to the center of the finger stroke.

Note 2) When holding a workpiece close at the end of open/close stroke of fingers, detecting performance of the combinations listed in the above table may be limited, depending on the hysteresis of an auto switch, etc.

Various auto switch applications are possible through different combinations of auto switch quantities and detecting positions.

## 2) Detection when Gripping Interior of Workpiece

Detection example		1. Confirmation of fingers in reset position	2. Confirmation of workpiece held	3. Confirmation of workpiece released	
Position to be detected		Position of fingers fully closed 	Position when gripping a workpiece 	Position of fingers fully opened 	
Operation of auto switch		Auto switch turned ON when fingers return. (Light ON)	Auto switch turned ON when gripping a workpiece. (Light ON)	When a workpiece is not held (Abnormal operation): Auto switch to turn ON (Light ON)	
Detection combinations	One auto switch = One position, any of ①, ② and ③ can be detected.	●	●	●	
	Two auto switches = Two positions of ①, ② and ③ can be detected.	Pattern A	●	—	
		Pattern B	—	●	●
Pattern C	●	—	●		
How to determine auto switch installation position		Step 1) Fully close the fingers. 	Step 1) Position fingers for gripping a workpiece. 	Step 1) Fully open the fingers. 	
At no pressure or low pressure, connect the auto switch to a power supply, and follow the directions.		Step 2) Insert the auto switch into the auto switch installation groove in the direction shown in the following drawing.			
					
		Step 3) Move the auto switch in the direction of the arrow and fasten it at a position 0.3 to 0.5 mm beyond the position where the indicator light illuminates.	Step 3) Slide the auto switch in the direction of the arrow until the indicator light illuminates.		
					
		Step 4) Slide the auto switch further in the direction of the arrow until the indicator light goes out.			
Step 5) Move the auto switch in the opposite direction 0.3 to 0.5 mm in the direction indicated by the arrow from its location when the indicator light comes on again.		Position where light turns ON 			
					
		Position to be secured 			

Note 1) It is recommended that gripping of a workpiece be performed close to the center of the finger stroke.

Note 2) When holding a workpiece close at the end of open/close stroke of fingers, detecting performance of the combinations listed in the above table may be limited, depending on the hysteresis of an auto switch, etc.

# MHK2 Series

## Auto Switch Hysteresis

Auto switches have hysteresis similar to micro switches. Use the table below as a guide when adjusting auto switch positions, etc.

Auto switch Model	Max. hysteresis (mm)	
	D-M9□(V) D-M9□A(V) M9□W(V)	
MHK□2-12	0.1	
MHK□2-16	0.1	
MHK□2-20	0.3	
MHK□2-25	0.2	

## Auto Switch Mounting

To set the auto switch, insert the auto switch into the installation groove of the gripper from the direction indicated in the following drawing. After setting the position, tighten the attached auto switch mounting set screw with a flat head watchmaker's screwdriver.

Note) Use a watchmaker's screwdriver with a grip diameter of 5 to 6 mm to tighten the auto switch mounting screw. Also, tighten with a torque of about 0.05 to 0.15 N·m, or about 0.05 to 0.10 N·m for D-M9□A(V).

## Protrusion of Auto Switch from Edge of Body

- The amount of auto switch protrusion from the body's end surface is as shown in the table below.
- Use the table as a guideline for mounting.

Note) When auto switch for MHK2, MHKL2 is set on mounting side as figure below, allow for at least 1 mm on mounting plate since the auto switch is protruded from edge of gripper.

Air gripper model	Auto switch model Gripper position	In-line electrical entry type		Perpendicular electrical entry type	
		D-M9□ D-M9□W	D-M9□A	D-M9□V D-M9□WV	D-M9□AV

MHKL2-25□	Open	—	—	—	—
	Closed	1	3	—	1

Note) There is no protrusion if no values are entered in the table.

# MHK2 Series

# Made to Order: Individual Specifications 1

Symbol

**-X39**

## 1 With Grease Nipple

Lubrication from grease cup to interior is possible.

### How to Order

**MHK** Standard part number - **X39**

With Grease Nipple ↓

### Specifications

Bore size (mm)	<b>16, 20, 25</b>
Action	Double acting, Single acting (Normally open, Normally closed)
Lubricant grease	MHK standard grease (MH-G01)
Grease nipple position	Refer to the dimensions and figure below.
Specifications/dimensions other than the above	Same as the standard type

Note 1) Fill lubricant to the bearing from the grease cup in order to prevent foreign particles from getting in. The use of special grease MH-G01 for MHK is recommended.

Note 2) Not compatible with ø12.

### Dimensions (Dimensions other than specified below are the same as the standard type.)

#### MHK2 Series MHKL2 Series

Model	(mm) A
MHK2-16□□□-X39	30.5
MHK2-20□□□-X39	44.5
MHK2-25□□□-X39	45
MHKL2-16□□□-X39	36
MHKL2-20□□□-X39	42
MHKL2-25□□□-X39	47.5

## 2 Grooves for Auto Switch on Both Sides

Symbol  
**-X41**

It is possible to select the auto switch mounting side. A maximum of 4 auto switches are mountable.

### How to Order

**MHK2**  
**MHKL2**

— Bore size — — — — Switch type — — **X41**

- Action
- Finger option
- Dust cover option

Auto switch type  
\* Refer to the standard type.

Suffix for auto switch

Nil	2 pcs.
S	1 pc.
n	n pc.

\* Possible to mount up to 4 auto switches

### Specifications

Bore size (mm)	12, 16, 20, 25
Additional switch groove position	Refer to the dimensions and figures below.
Specifications/dimensions other than the above	Same as the standard type

### Dimensions (Dimensions other than specified below are the same as the standard type.)

#### MHK2 Series MHKL2 Series

Model	(mm)	
	A	B
MHK2-12□□□-X41	10.4	1.8
MHKL2-12□□□-X41	10.4	1.8
MHK2-16□□□-X41	12.8	1.6
MHKL2-16□□□-X41	12.8	1.6

\* Dimensions A and B of other models are same as standard switch grooves.

# MHK2 Series Specific Product Precautions

Be sure to read this before handling the products.

## Mounting Air Grippers/MHK2 Series

Possible to mount from 3 directions.

### Axial Mounting (Body tapped)

Model	Applicable bolts	Max. tightening torque N·m	Max. screw-in depth L mm
MHK2 -12□ MHKL2-12□	M3 x 0.5	0.88	6
MHK2 -16□ MHKL2-16□	M4 x 0.7	2.1	8
MHK2 -20□ MHKL2-20□	M5 x 0.8	4.3	10
MHK2 -25□ MHKL2-25□	M6 x 1	7.3	12

### Vertical Mounting (Body tapped)

Model	Applicable bolts	Max. tightening torque N·m	Max. screw-in depth L mm
MHK2 -12□ MHKL2-12□	M3 x 0.5	0.59	4
MHK2 -12□ MHKL2-12□	M3 x 0.5	0.74	5
MHK2 -16□ MHKL2-16□	M4 x 0.7	0.88	4
MHK2 -16□ MHKL2-16□	M4 x 0.7	1.3	5
MHK2 -20□ MHKL2-20□	M5 x 0.8	3.3	8
MHK2 -25□ MHKL2-25□	M6 x 1	5.9	10

### Lateral mounting (Body tapped and through-hole)

#### Body tapped

Model	Applicable bolts	Max. tightening torque N·m	Max. screw-in depth L mm
MHK2 -12□ MHKL2-12□	M4 x 0.7	2.1	8
MHK2 -16□ MHKL2-16□			8
MHK2 -20□ MHKL2-20□	M5 x 0.8	4.3	10
MHK2 -25□ MHKL2-25□	M6 x 1	7.3	12

#### ●Body through-hole

Model	Applicable bolts	Max. tightening torque N·m
MHK2 -12□ MHKL2-12□	M3 x 0.5	0.88
MHK2 -16□ MHKL2-16□		
MHK2 -20□ MHKL2-20□	M4 x 0.7	2.1
MHK2 -25□ MHKL2-25□	M5 x 0.8	4.3

### How to Mount the Attachment to the Finger

- To mount the attachment to the finger, make sure to use a wrench to support the attachment so as not to apply undue strain on the finger.
- Refer to the table below for the proper tightening torque on the bolt used for securing the attachment to the finger.

Model	Applicable bolts	Max. tightening torque N·m
MHK2 -12□ MHKL2-12□	M3 x 0.5	0.59
MHK2 -16□ MHKL2-16□		
MHK2 -20□ MHKL2-20□	M4 x 0.7	1.4
MHK2 -25□ MHKL2-25□	M5 x 0.8	2.8
